## PROFILE

In my work experience I acquired many skills, such as team management, group management, work under pressure, result-oriented work, having specific goals of time and results, creativity and proactivity, but now I am looking for the challenge that changes my life and take me to another level of experiences, growing and learning every day.

I am a very proactive person, always looking for a way to improve and complement my knowledge. Not knowing is a temporary state if you have the initiative.
